2.1 Eisenhower Matrix

	Urgent	Not Urgent
Important	MVP ● Add a book to your personal bookshelf (title and author) ● View all books saved in your library ● Organize books into three categories: Want to Read, Currently Reading, and Finished. ● Update a book's reading status ● Remove books from the bookshelf ● Save book information so it remains available when the application is reopened**(maybe)	Schedule ● Track reading progress by page number or percentage. ● Add personal ratings and written reviews. ● Organize books by genre, author, or custom tags. ● Search and filter books in the library.
Not Important	Delegate ● Retrieve book information, such as publication dates and blurbs, through an existing book database API. ● Use an existing library or framework for displaying book cover images. ● Use prebuilt interface components for basic navigation and layout.	Delete ● In-app book clubs and discussion forums. ● AI chatbot for discussing books. ● Complex animations and decorative interface effects.
